

Nasser Allahdadi

Senior Java & Spring Boot Backend Engineer

n.allahdadi@outlook.com · +98 930 112 3585
linkedin.com/in/nallahdadi · Tehran, Iran

Backend software engineer with 14 years of experience across banking, payments, and network software. For the past 7+ years at TOSAN — Iran's largest payment service provider — focused on designing Java backend subsystems for the bank's switch back office, working daily with Spring, Spring Boot, and JPA/Oracle persistence. Earlier career included C/C++ and ATM programming on the WOSA/XFS standard using Qt. Working familiarity with Kafka, event-driven systems, and classical machine learning; currently exploring modern JS full-stack development (Node.js, Next.js, Prisma) as a self-taught side project.

EXPERIENCE

Software Developer Nov 2017 — Present

TOSAN — Tehran, Iran (largest Payment Service Provider in Iran)

- Design and maintain Java backend subsystems for the bank's switch back office, with extensive JPA/Oracle work — entity modeling, complex joins, and datasource management.
- Apply Java concurrency and multi-threading to keep high-volume transaction services reliable.
- Contribute to modernization toward Spring Boot microservices and Kafka-based event-driven patterns; explore n8n workflow automation and LLM-assisted tooling.
- Maintain ATM software built on the WOSA/XFS standard, handling ISO 8583 transaction & payment processing.

Software Developer Feb 2017 — Nov 2017

Infotech International Group — Tehran, Iran (official Ingenico partner)

- Developed and fixed the S2M Switch software, a payment switch built on the ISO 8583 standard.
- Worked with Oracle/PL-SQL, Linux shell scripting, and socket-level network programming.

Software Developer — Team Lead Aug 2012 — Feb 2017

Intelligence Processing — Tehran, Iran (network solutions)

- Led the development team and the Secure Connections specialist team.
- Built network-based software covering cryptography, protocol analysis, and multi-threaded system programming.

SKILLS

Java, Spring / Spring Boot, JPA — **Expert**
ISO 8583, WOSA/XFS, Transaction Processing — **Expert**
Concurrency & Multi-threading — Advanced
Docker / Kubernetes, Git / CI-CD — Advanced
Kafka & Event-Driven Systems — Intermediate
Node.js, Next.js, Prisma — Familiar (self-taught)

C / C++, Qt Framework — **Expert**
Oracle / PL-SQL — **Expert**
Network / Socket Programming, Cryptography — Advanced
n8n Workflow Automation — Advanced
LLM / GenAI, Machine Learning (classical) — Intermediate

EDUCATION

MSc, Computer Engineering (Hardware & Software)
Science and Research Branch — Tehran, Iran · 2016–2018
BSc, Computer Engineering (Hardware & Software)
Hamadan University of Technology — Hamadan, Iran · 2007–2012

CERTIFICATES

Java Spring Advanced Learnings TOSAN, 2020
CEH — Certified Ethical Hacker Intelligence Processing, 2016
MTCNA Rahin Co, 2014
Network+ Hamadan TVTO, 2010
